ENGR 4350: Applied Deep Learning

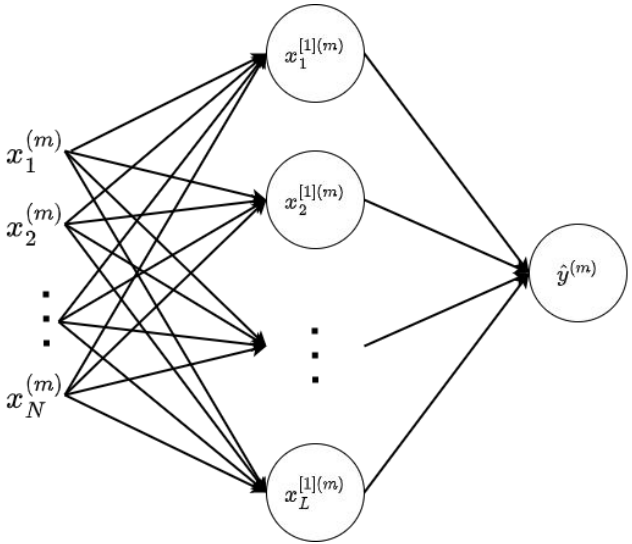
Neural Network: Part 2

09/21/2022

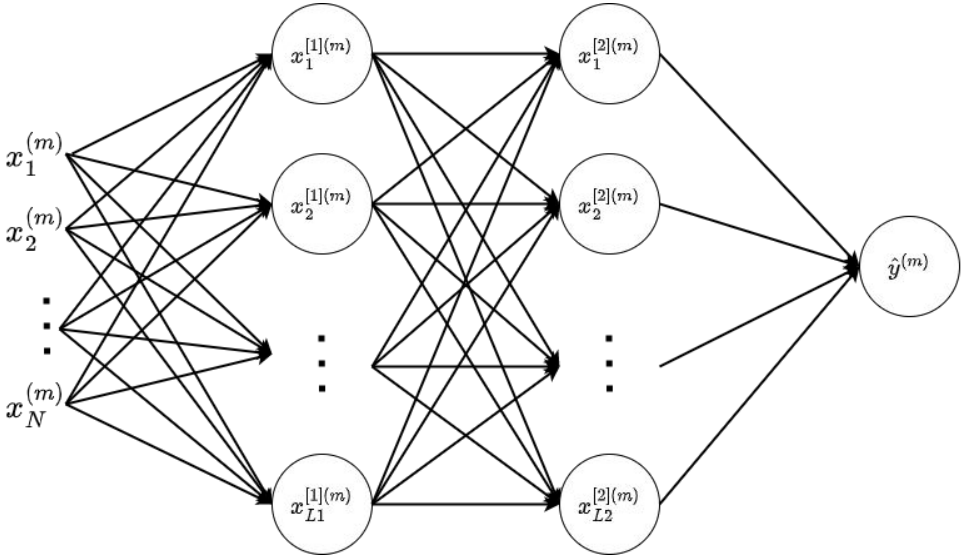
Outline

- Multi-layer Neural Network
- Forward & Backward Propagation

Multi-Layer Neural Network

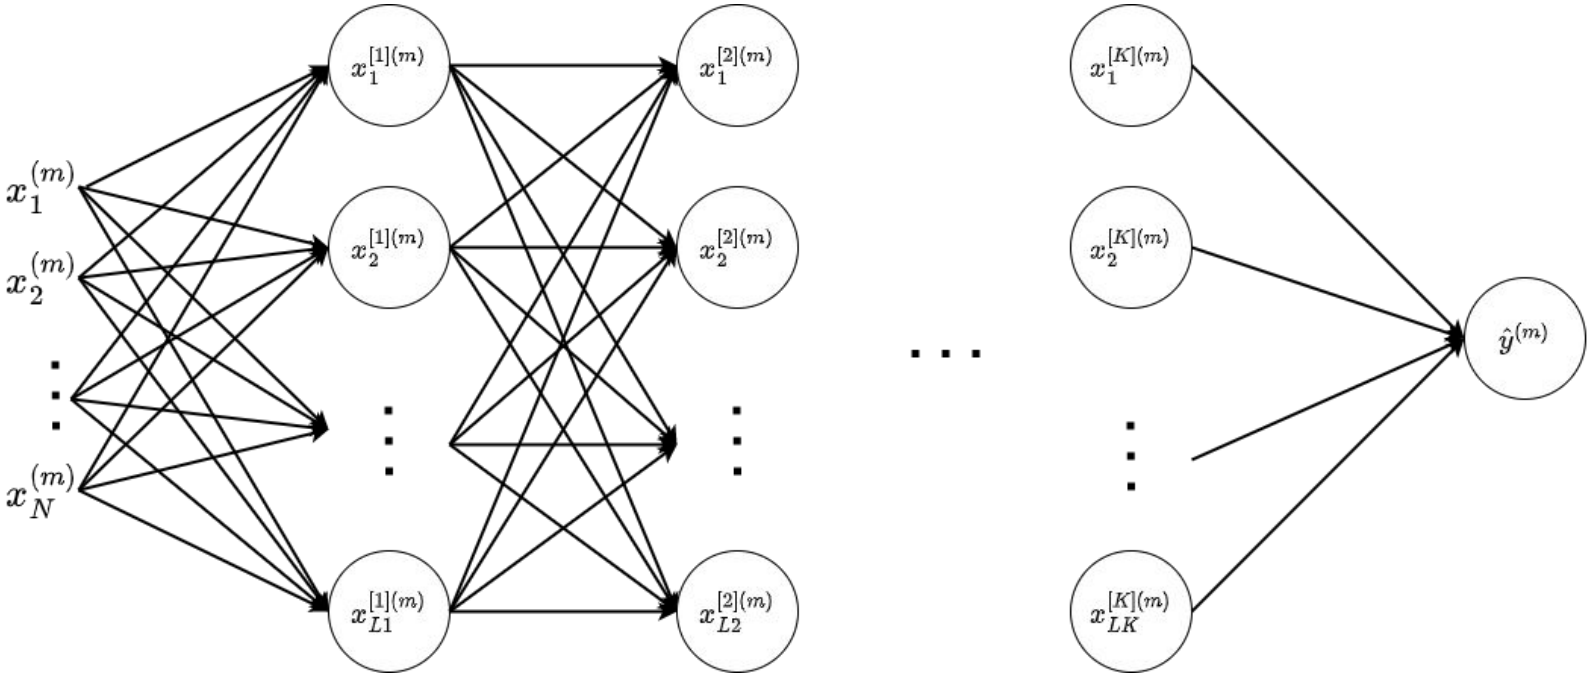


2-layer Neural Network



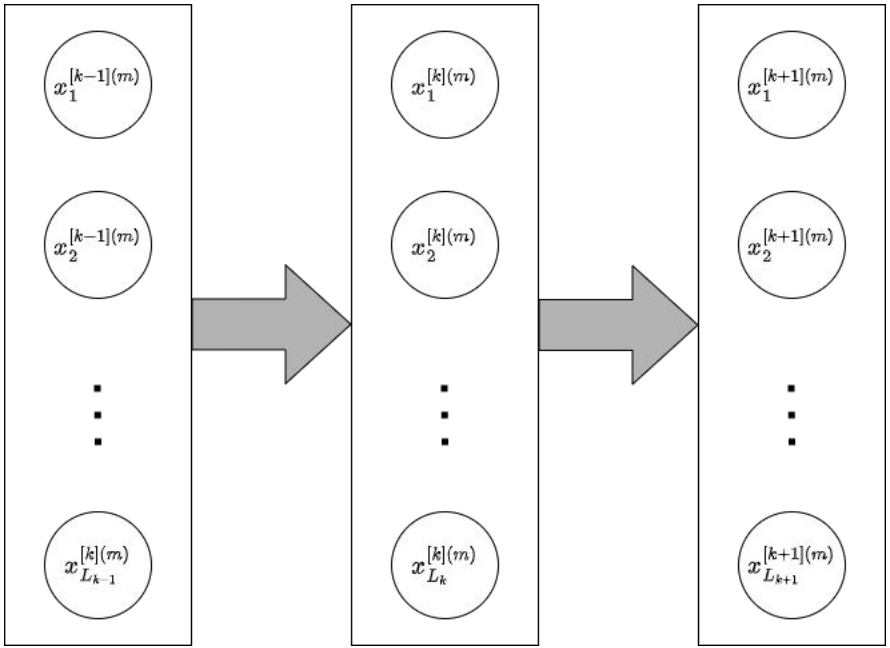
3-layer Neural Network

Multi-Layer Neural Network



K-layer Neural Network

View of a General Layer



Forward Propagation

$$\mathbf{X}^{[\mathbf{k}]} = g\left(\mathbf{X}^{[\mathbf{k-1}]}\mathbf{W}^{[\mathbf{k}]\mathbf{T}} + \mathbf{b}^{[\mathbf{k}]}\right)$$

Backward Propagation

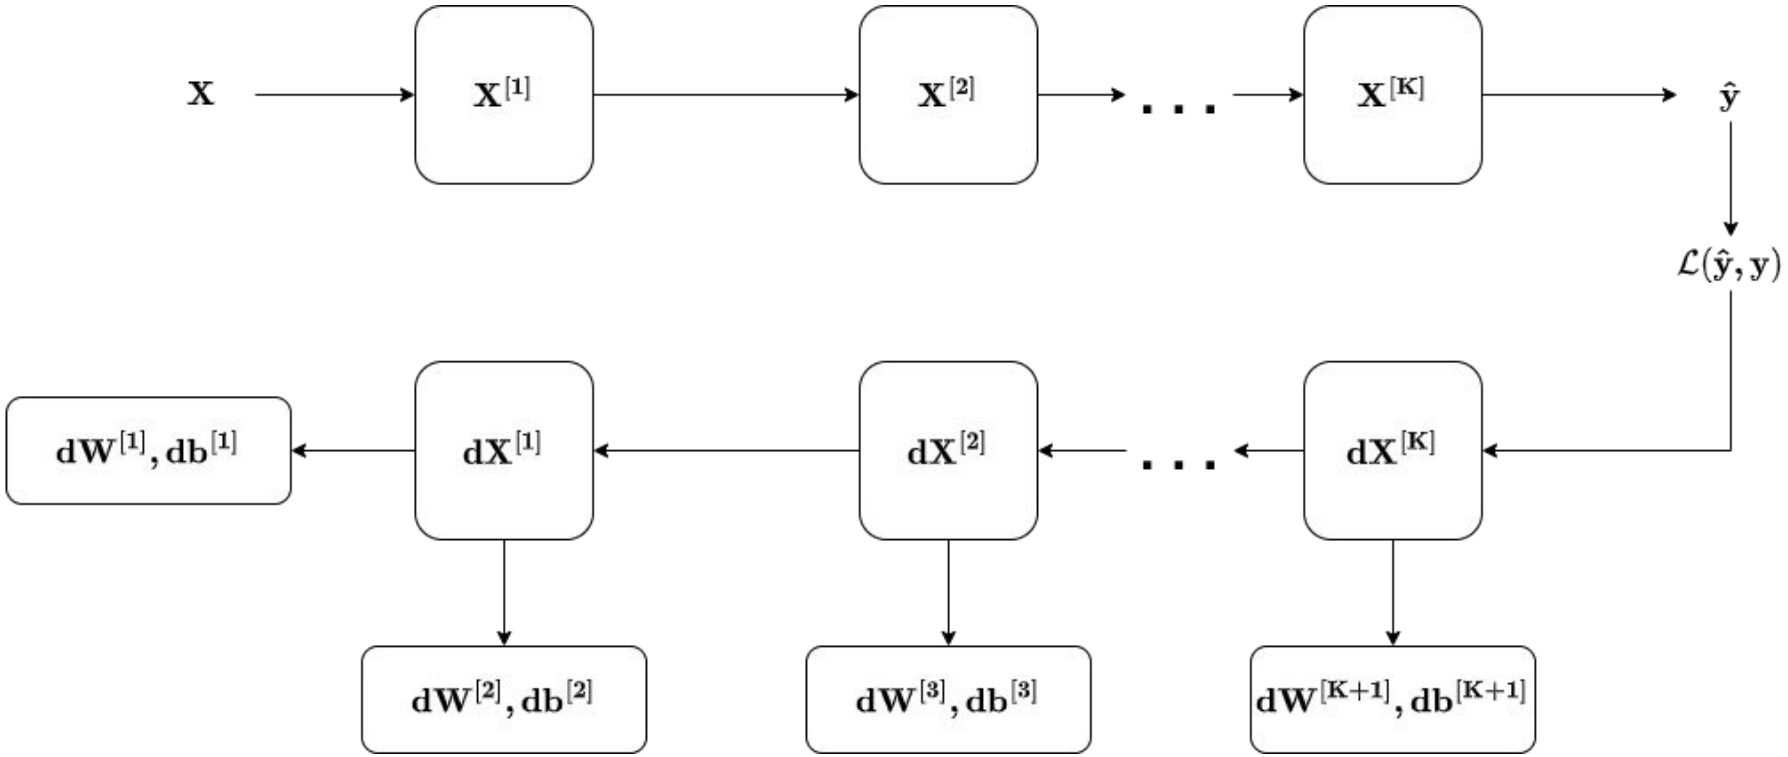
$$d\mathbf{Z}^{[\mathbf{k}]} = d\mathbf{X}^{[\mathbf{k}]} * \mathbf{g}'\left(\mathbf{Z}^{[\mathbf{k}]}\right)$$

$$d\mathbf{W}^{[\mathbf{k}]} = \frac{1}{M} d\mathbf{Z}^{[\mathbf{k}]\mathbf{T}} \cdot \mathbf{X}^{[\mathbf{k-1}]}$$

$$d\mathbf{b}^{[\mathbf{k}]} = \frac{1}{M} \sum_{m=1}^{M} d\mathbf{Z}^{[\mathbf{k}]}$$

$$d\mathbf{X}^{[\mathbf{k-1}]} = d\mathbf{Z}^{[\mathbf{k}]} \cdot \mathbf{W}^{[\mathbf{k}]}$$

Forward/Backward Propagation



Forward Propagation

For layer k=1 to K

$$\mathbf{X}^{[\mathrm{k}]} = g_{\mathrm{k}}\left(\mathbf{X}^{[\mathbf{k-1}]}\mathbf{W}^{[\mathrm{k}]\mathrm{T}} + \mathbf{b}^{[\mathrm{k}]}\right)$$

where, input: $\mathbf{X} = \mathbf{X}^{[0]}$, output: $\hat{\mathbf{y}} = \mathbf{X}^{[\mathrm{K}]}$

$$J\left(\mathbf{W}^{[\mathbf{1}]}, \ldots, \mathbf{W}^{[\mathbf{K}]}, \mathbf{b}^{[\mathbf{1}]}, \ldots, \mathbf{b}^{[\mathbf{K}]}\right) = \frac{1}{M}\sum_{m=1}^{M}\mathcal{L}(\hat{\mathbf{y}}, \mathbf{y})$$

Backward Propagation

For layer k=K to 1

$$d\mathbf{X}^{[\mathbf{k}]} = \frac{\partial J}{\partial \mathbf{Z}^{[\mathbf{k+1}]}} \cdot \frac{\partial \mathbf{Z}^{[\mathbf{k+1}]}}{\partial \mathbf{X}^{[\mathbf{k}]}} = d\mathbf{Z}^{[\mathbf{k+1}]} . \mathbf{W}^{[\mathbf{k+1}]} \qquad \text{except: } d\mathbf{X}^{[\mathbf{K}]} = \frac{\partial J}{\partial \hat{\mathbf{y}}}$$

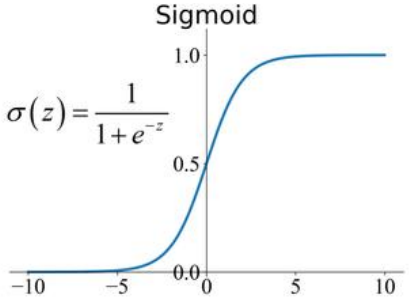
$$d\mathbf{Z}^{[\mathbf{k}]} = \frac{\partial J}{d\mathbf{X}^{[\mathbf{k}]}} \cdot \frac{\partial \mathbf{X}^{[\mathbf{k}]}}{\partial \mathbf{Z}^{[\mathbf{k}]}} = d\mathbf{X}^{[\mathbf{k}]} * \mathbf{g}'\left(\mathbf{Z}^{[\mathbf{k}]}\right)$$

$$d\mathbf{W}^{[\mathbf{k}]} = \frac{\partial J}{\partial \mathbf{Z}^{[\mathbf{k}]}} \cdot \frac{\partial \mathbf{Z}^{[\mathbf{k}]}}{\partial \mathbf{W}^{[\mathbf{k}]}} = \frac{1}{M}\left(d\mathbf{Z}^{[\mathbf{k}]}\right)^T \cdot \mathbf{X}^{[\mathbf{k-1}]}$$

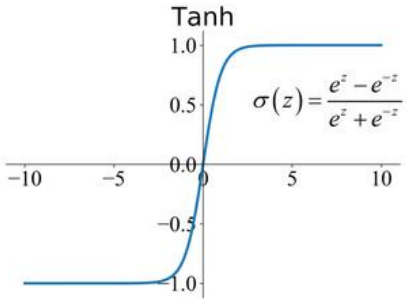
$$d\mathbf{b}^{[\mathbf{k}]} = \frac{\partial J}{\partial \mathbf{Z}^{[\mathbf{k}]}} \cdot \frac{\partial \mathbf{Z}^{[\mathbf{k}]}}{\partial \mathbf{b}^{[\mathbf{k}]}} = \frac{1}{M} \sum_1^M \left(d\mathbf{Z}^{[\mathbf{k}]}\right)^T, \text{ axis=0, keepdims=True}$$

Activation Functions

$\sigma'(z) = \sigma(z)(1 - \sigma(z))$

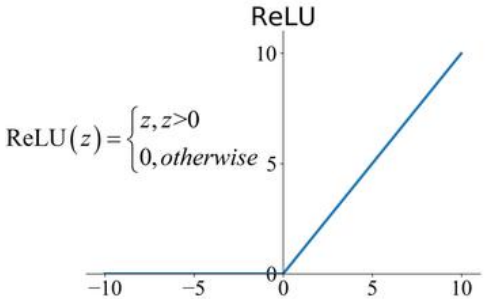


(a)

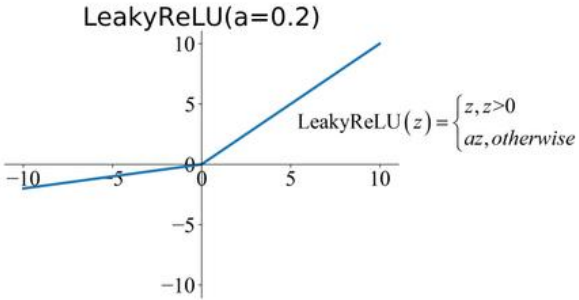


(b)

$\sigma'(z) = 1 - \sigma^2(z)$



(c)



(d)

$$\mathrm{ReLU}'(z) = \begin{cases} 1, & z > 0 \\ 0, & otherwise \end{cases}$$

$$\mathrm{LeakyReLU}'(z) = \begin{cases} 1, & z > 0 \\ a, & otherwise \end{cases}$$
