Hello everybody out there using minix -

I'm doing a (free) operating system (just a hobby, won't be big and professional like gnu) for 386(486) AT clones. This has been brewing since april, and is starting to get ready. I'd like any feedback on things people like/dislike in minix, as my OS resembles it somewhat (same physical layout of the file-system (due to practical reasons) among other things).

I've currently ported bash(1.08) and gcc(1.40), and things seem to work. This implies that I'll get something practical within a few months, and I'd like to know what features most people would want. Any suggestions are welcome, but I won't promise I'll implement them :-)

Linus (torvalds@kruuna.helsinki.fi)

PS. Yes - it's free of any minix code, and it has a multi-threaded fs. It is NOT protable (uses 386 task switching etc), and it probably never will support anything other than AT-harddisks, as that's all I have :-).

Linux Distributions

Ubuntu Get Started

Ubuntu Installation Guide

Crash into Ubuntu Desktop

- Additional drivers
- Settings
- Software store

Command-Line Interface

- Ubuntu CLI Tutorial:
<https://ubuntu.com/tutorials/command-line-for-beginners#1-overview>

Command-Line Interface

- Shell vs. Terminal
- Prompt: <user>@<machine>:<location><user privilege>
- Video resources:
 - [Beginner's Guide to the Bash Terminal](#)
 - [Linux Commands for Beginners](#)
- Basic commands:
 - ls - list contents
 - pwd - print current working directory
 - cd - change directory
 - mkdir - make a new directory
 - cp - copy contents
 - mv - move contents
- Super user
- APT package manager

Shell vs. Terminal
